SUMMARY

Software infrastructure leader focused on developer tooling, AI-assisted engineering workflows, and developer productivity at scale. TC39 delegate leading the source maps task group; Frontend Masters instructor.

EXPERIENCE

Technical Lead, SDLC Tooling & AI Workflows — Bloomberg 2023 – Present

- Promoted to lead Bloomberg's SDLC, developer tooling, and AI workflows for 3,200+ engineers.
- Rolled out standardized agent instructions to 80% of engineering, cutting incorrect tool usage roughly in half when AI coding agents work with Bloomberg's proprietary tools.
- Shipped AI PR review and agentic workflows that triage crashes and propose fixes.

Staff Developer Advocate — Cloudflare 2021 – 2022

- Tech lead for Developer Advocacy Engineering, building tools and technical content for Cloudflare's developer platform.
- Created production-quality demos and reference implementations for Workers, KV, Durable Objects, and Wrangler CLI.

Staff Software Engineer — Adobe 2020 – 2021

- Promoted to Staff Engineer after leading delivery of Adobe Assets, a new Creative Cloud application for desktop and web, since merged into the main Creative Cloud app.
- Served on Creative Cloud Architecture Review Board, guiding framework, language, and tooling decisions.

Senior Software Engineer — Adobe 2017 – 2020

- Led modernization of Adobe's Creative Cloud web stack and migration strategy.
- Introduced React, TypeScript, Jest, and modern deployment patterns across Creative Cloud web applications.

Senior Software Engineer — Brave 2016 – 2017

- Built open-source browser features with Electron, React, Node.js, and Immutable.js.

Software Engineer — Twitter 2014 – 2016

- Built twitter.com features across Home Timeline, Who to Follow, and Search.

Earlier: Barracuda Networks — Software Engineer · Insite Design Lab — Founder
